

A small figure made of trash, including a blue plastic bag, a red and white milk carton, a blue water bottle, and several metal cans, is floating in space. The Earth is visible on the left side of the frame, and the background is a starry space.

Rusty's...

around-the-world
Adventure!

Scientists believe that at least one million species of life could be living out here.

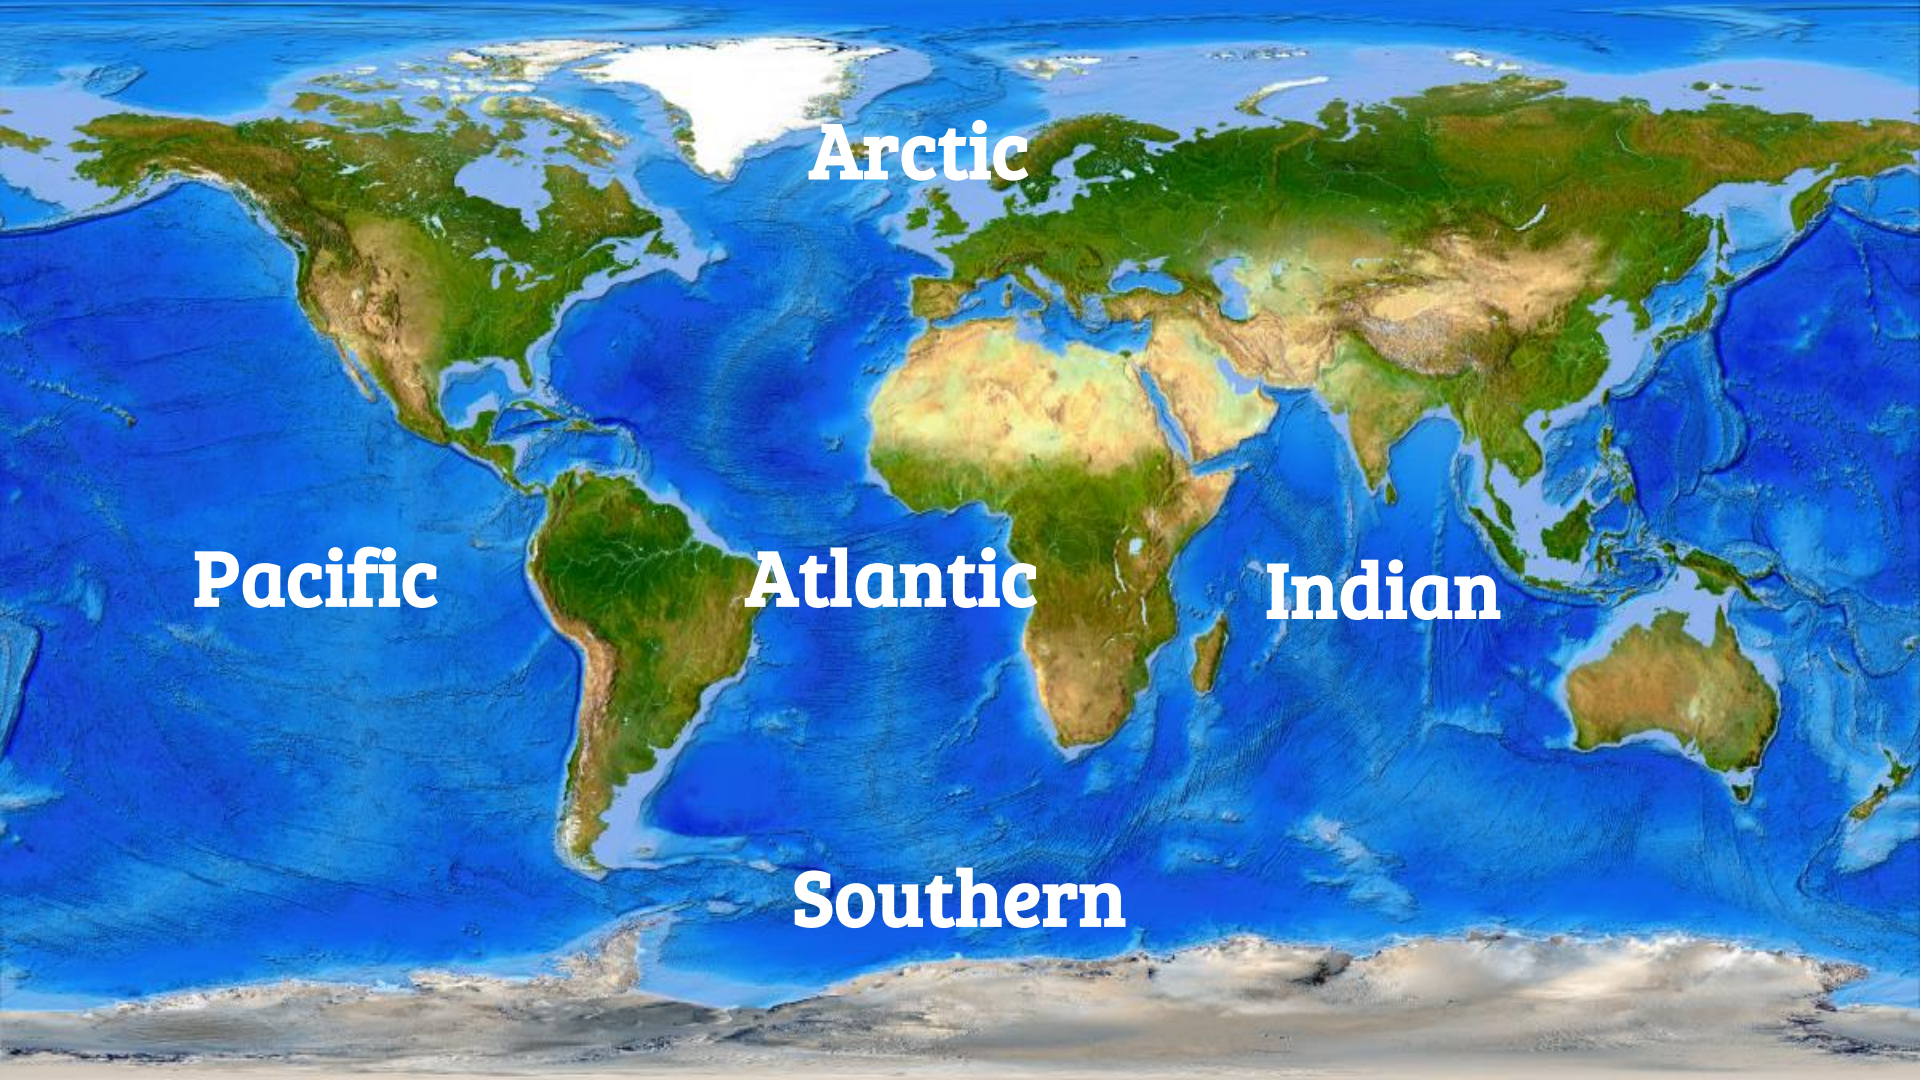

These places provide over ½ of the oxygen you humans breathe.

These places cover over 70% of the earth's surface.

Where am I?

the oceans!

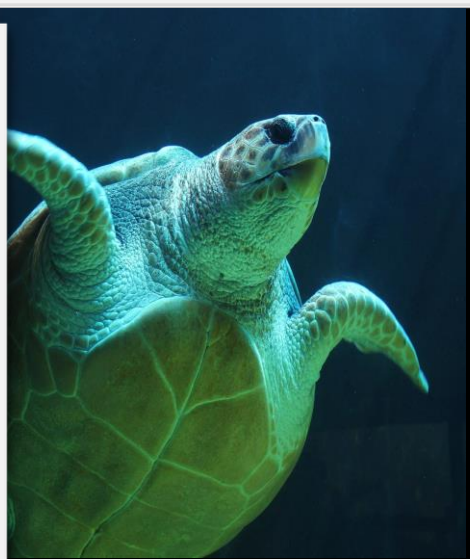

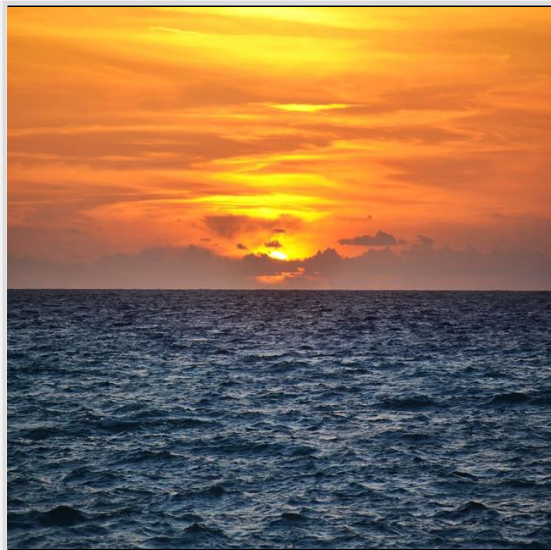

Arctic

Pacific

Atlantic

Indian

Southern

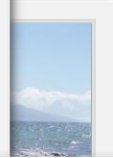

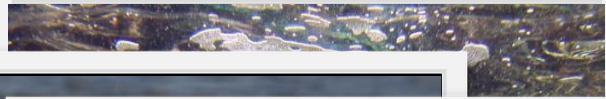

1. Have you been to the ocean, or someplace like it?

1. What do you love about the ocean? Why are they important?

1. And what would you do if they were at risk?

1. **Where** did this stuff come from?
2. **How** did it get to the oceans?
3. **What** must we do about it today?
